

10th International Congress on Transportation Research
«Future Mobility and Resilient Transport: Transition to innovation»

Rhodes, September 2-3 2021

www.ictr.gr

EXTENDED DEADLINE FOR ABSTRACTS SUBMISSION:

FEBRUARY 19, 2021

The Hellenic Institute of Transport (HIT/CERTH) and the Hellenic Institute of Transportation Engineers (HITE) co-organize the «10th International Congress on Transportation Research», which will be held in September 2-3 2021. The spotlight theme of the 2021 Congress is «*Future Mobility and Resilient Transport: Transition to innovation*». The organizers' intention is to hold the conference with physical attendance on the beautiful island of Rhodes.

The ICTR has been a major event in the field of transportation research for the past 19 years. Potential ICTR participants include the research and academic community, as well as the public and private sector involved in the development and implementation of innovative projects in the field of transport.

The rapid development of technology and the need to achieve new energy and environmental goals for climate-neutral transport has transformed the whole transportation sector. Thus, transport research is critical for achieving innovative solutions that will meet future challenges through synergies among the industry and public sector.

In this context, the objective of the Conference is to showcase recent top-notch research activities in transportation, merge research findings and policy making tasks, facilitate the exchange of knowledge in the local and international level and draw conclusions and shape recommendations on the future of transportation in Greece and abroad.

The 10th International Congress on Transport Research looks forward to discussing the challenges of future transport systems through its main sessions as well as additional special Workshops with the participation of representatives of the research community, industry and public sector. The proposals for the organization of the special workshops can be formulated based on the template provided at the conference website and sent to the email address of the Organizing Committee **until March 15, 2021**.

Submissions in the following topics are strongly encouraged (submitted work in other topics relevant to transportation will be considered as well). There is no limitation in the transport modes.

- Sustainable urban mobility, implementation and new synergies
- Innovative and interconnected mobility services

- Intelligent transport systems (all modes)
- Big data analytics and Artificial Intelligence
- Simulation environments and new modeling tools
- Climate neutral and energy efficient transport and infrastructure
- User-centered design of transport systems
- On-demand freight transport and logistics
- Transport safety
- Resilient transport systems and infrastructure
- Transport planning and policy
- Transportation and mobility in the COVID-19 era

Submissions will be completed in two phases (initially abstracts and subsequently full-text papers), through ICTR's website (www.ictr.gr), according to the following time schedule:

- **19th February 2021:** Extended deadline for abstracts submission (up to 500 words)
- **28th February 2021:** Notification of acceptance deadline (approximate)
- **15th March 2021:** Proposals of special Workshops deadline
- **30th April 2021:** Full-text paper submission deadline
- **31st May 2021:** Authors informed on review results (approximate)
- **30th June 2021:** Final paper submission deadline

Guidelines on the format of abstracts and full-text papers will become available at the Congress website.

Finally, selected high-impact papers will be considered for publication in international scientific journals (Special Journal Issues), following an additional peer-review process. Title of journals will be announced on time.

For more information regarding ICTR 2021 please visit the Congress website www.ictr.gr.

We look forward to welcoming you to Rhodes!

Sincerely yours,

ICTR 2021 Organizing Committee
