

Workshop V

EN.I.R.I.S.S.T. and EN.I.R.I.S.S.T. Plus: Innovation in Shipping, Supply Chain, Transport and Logistics

EN.I.R.I.S.S.T. is the National Research Infrastructure for shipping, supply chain and transport in Greece which aims at developing a knowledge-based data repository and an intelligent platform of services to support existing and future research in the maritime, land and air, passenger and freight sectors as well as private and public stakeholders in the process of policymaking and the promotion of transport research activities in Greece. EN.I.R.I.S.S.T. has achieved to:

- Develop an intelligent research and business platform to support key economic activities and small and medium-sized enterprises active in the areas of research infrastructure interest.
- Collect, process and provide researchers and users with information & tools on national & international passenger & freight transport including sea, air, inland and intermodal transport.
- Support stakeholders in original research, investment plans and policies (academic community, researchers, infrastructure operators, private & public companies, policy makers).
- Create a multi-dimensional institution of economic & research development for Greece, by creating new & enhancing existing networks that will ensure the flow of knowledge & information.

The EN.I.R.I.S.S.T. consortium consists of 8 academic institutions and 3 research centers in Greece, specialized in shipping, supply chain, transportation, as well as software development.
